Abd Alrahman Alsaadi

Backend Developer

Syria, Damascus | abdalrahmanalsaadi32@gmail.com | +963 994493352 | linkedin.com/in/Abd Alrahman Alsaadi | github.com/AbdAlrahmanAlsaadi

PERSONAL STATEMENT

Laravel Back-End Developer with over 1 year of experience in creating reliable and scalable server-side applications. Skilled in improving performance, managing server-user data flow, and developing secure solutions. Dedicated to staying updated with the latest tools and practices in back-end development.

PROJECTS

Home Workout App - 9/2024

Damascus University
• Designed and developed a home workout app to provide effective exercises for users at home.
• Optimized app performance to ensure fast and reliable functionality, resulting in a 40% increase in user satisfaction.
• Integrated reminder and notification features to help users maintain a regular workout routine.
• Used modern technologies to deliver a personalized fitness experience tailored to each user's needs.

Pharmacy Management System - 2/2024
Damascus University
• Developed the back-end of the system, ensuring smooth management of medications and prescriptions.
• Created secure APIs for seamless communication between the database and front-end.
• Optimized database queries, improving system performance and reducing data response time by 25%.
• Ensured data security and scalability for future growth in pharmacy operations.

Chat App - 11/2024
• Designed and implemented the Back-End architecture to support real-time messaging and multimedia sharing.
• Utilized Pusher for real-time communication between users, ensuring low latency and seamless synchronization.
• Integrated scalable database structures to manage user accounts, messages, and media files efficiently
• Ensured system reliability by implementing robust error handling and fail-safe mechanisms for server operations.

SKILLS

- Programming Languages: PHP, Java.
- Framework: Laravel.
- Database: Mysql.
- Pusher.
- Firebase.
- RESTful APIs.
- MVC design patterns.
- SOLID principles.
- Git, GitHub.
- Html.
- CSS.
- CssTailwind.

Education

Information Technology Engineering|*Damascus University* 10/2021 – Present.

Technical Expertise

- Designing Back-End Architecture.
- Working with Databases (SQL/NoSQL) and Management.
- Developing APIs and Network Integration.
- Data Management and Cloud Storage.
- Application Security.
- App Deployment and Distribution
